

# March

News from

**The 4th grade Team**

## Reading

The students will be working describing a character, setting, and event using Dr. Seuss books in honor of his birthday and Read Across America. Towards the end of the month we will look at text structure and interpreting information presented visually to help contribute to the understanding of the text. *How do the pictures and graphs help me better understand what I am reading?*

## Science

This month we will start exploring the Rock Cycle. We will learn how to classify rocks based on their physical properties and magnetic attraction or reaction to water. We will explore the different types of rocks and processes that form them.

## Math

The students will finish working with fractions by converting fractions to decimals using tenths and hundredths. We will begin working with measurement by exploring area and perimeter.
